Liudmila Mantrova

Senior Technical Writer

l.mantrova@gmail.com | +46 76 225 66 01 | LinkedIn | Stockholm (work permit)

Senior Technical Writer specializing in structured documentation for developer tools and database systems. I combine strong cross-team collaboration with hands-on product experience to turn complex content into clear, accurate, user-focused documentation. Managing technical documentation delivery for multiple product lines, I drive efficiency through content reuse, workflow automation, and standardized documentation lifecycle processes.

Skills & Technologies

Content Management: Structured authoring, information architecture, style guide development, content management systems (CMS), technical illustration, Simplified Technical English (STE), SEO, Google Analytics

Authoring Tools & Technologies: Markdown, XML (DITA, DocBook), HTML, CSS, XMetaL, Oxygen, Adobe Illustrator

Development & Collaboration Tools: Git, Linux, CLI, Jira, Confluence

Programming & Scripting: Python, SQL

Languages: English (fluent), Swedish (fluent), Russian (native), German (basic)

Experience

Freelance technical communicator November 2025 – now

- Edited and translated a book on PostgreSQL database internals, leveraging AI capabilities for translation automation and quality assurance.

Sigma Technology, IT consulting company — Stockholm, Sweden

Documentation specialist (LIA internship) September 2025 – November 2025

- Automated documentation QA for Simplified Technical English (STE) compliance by extending NLP Python scripts with custom rule-based grammar checks, raising detection accuracy from 20% to ~80%.

Professional development, relocation & parental leave November 2022 – September 2025

- Achieved working proficiency in Swedish in approximately two years.
- Earned a Vocational Diploma in Technical Communication, including training in technical illustration.
- Completed in-person Python coursework conducted in Swedish, reinforcing both technical and language skills.

Postgres Professional, Database technology company — Moscow, Russia

Senior technical writer January 2017 – November 2022

- **Owned product documentation:** Took full ownership of Postgres Pro product documentation as the sole technical writer, delivering complete, on-time documentation for the first commercial release within three months of joining.
- **Improved documentation workflows:** Collaborated with DevOps and QA teams to establish a Git workflow for single-sourced XML documentation, in the spirit of the Docs as Code approach. Automated release notes generation from Jira notes, reducing authoring effort and making the process less error-prone.
- **Ensured documentation quality and integrity:** Worked with Customer Support and Testing teams to validate technical accuracy and completeness of the docs. Tracked and tested Git merge operations between private and open-source repositories to ensure documentation integrity.

- **Authored and reviewed technical content:** Gathered requirements, tracked feature completion, documented new features, coordinated reviews, and audited legacy documentation.

Intel Corporation, Semiconductor company and chip manufacturer — Moscow, Russia

Progressed from intern to senior technical writer, delivering documentation for high-performance computing (HPC) and game development product lines. Authored user manuals, getting started guides, reference documentation, and UI microcopy.

Senior technical writer — April 2014 – December 2016

Delivered documentation for game development software for several geo-distributed Scrum teams:

- Reviewed UI microcopy and error messages for consistency, grammar, and style.
- Collaborated with customer support to address recurring customer issues in documentation, updating documentation and producing video tutorials for critical workflows.
- Reviewed online content and performed iterative, data-informed documentation improvements based on Google Analytics data.

Technical writer — August 2009 – April 2014

- Acted as a team lead to train, mentor, and onboard technical writing interns into projects and ensure seamless documentation support for Intel performance libraries: provided training on tools and best practices, discussed information architecture and reviewed drafts for new documentation deliverables.
- Migrated Intel® Cluster Studio legacy Word documentation to single-sourced HTML, cutting authoring and maintenance effort by ~50%.

Technical writer intern — October 2007 – August 2009

- Contributed to corporate style-guide development; tested new authoring technologies and content-management solutions for DITA XML.
- Supported user guides and reference manuals for performance tuning software; prepared short screencasts using Adobe Captivate.

Education

Nizhny Novgorod State Linguistics University, Russia — 2004 – 2009
Diploma in linguistics, interpretation and translation (English, German, Russian)

Åsö Vuxengymnasium, Stockholm — 2023 – 2024
Swedish as a second language (SVA3); Programming 1 (Python)

Hermods Yrkeshögskola, Stockholm — 2024 – 2025
Vocational diploma in technical communication

Volunteering

Women in Big Data (2019): Organized meetups for 100+ attendees; secured a new corporate sponsor that enabled the program to expand into Armenia.
